 550mm Opaline = 500mm

Installation Procedure

Remove diffuser as shown in Instruction Sheet supplied with luminaire.

Fig 1. - Locate the holes marked 'A' in the housing and fit the cable clamp.

Fig 2. - Fit the screw clips (A) in the inner housing slots with the bent tabs as shown. Insert the clamps (B) through the housing outer slots and retain with screws (C), screwed 2mm into clip.

Fig 3. - Offer housing up to aperture and pass the mains cable through the clamp and into the housing. NOTE: Only 10mm of sleeved cable sheathing to enter the housing.

Fig 3. and 4. - Twin Clamps - Hold the clamps and insert the housing into aperture as shown and tighten screws.

Fig 5. - Triple Clamps - Hold one clamp as shown in Fig 3. and insert the housing into the aperture and locate the clamp on the inside of the mounting surface.

Repeat procedure with the remaining clamps in rotation and tighten the screws.

Complete the installation as described in the Instruction Sheet supplied with the luminaire.

IP44 Kit

Installation Procedure

Align the gasket bosses (A) with the housing outrigger fixing holes (B) and insert the gasket nipple (C) through the housing centre hole (D).

If wall mounting, drill a 6mm diameter hole in the housing and fit a drain plug as shown in Fig 1.

Stick the 'IP44' label (E) in a suitable position inside the housing.

It is recommended that the housing is installed using the outrigger fixing holes (B).

NOTE: To obtain IP44 protection the whole area of gasket must be in contact with a FLAT mounting surface.

IP44 = Protected against solid objects greater than 1mm and protected against splashing water.
