Trimlines are designed for mounting on, and terminating in a British Standard conduit box having a 50.8mm (2") fixing centres. The conduit box should be set flush in a flat mounting surface.

Installation should be carried out by a suitably qualified person in accordance with good electrical practise and the appropriate national wiring regulations.

Switch off mains electrical supply before commencing installation.

Installation Procedure

When mounting Trimlines in an exterior situation the thinner of the enclosed gaskets must be fitted between the gallery and the conduit box/mounting surface. Additionally, on Trimlines incorporating an annulus with a cut-out on the rear face of the gallery, the thicker of the enclosed gaskets must be fitted with the annulus.

During installation the weatherproof rating label, marked 'IP23' should be stuck to the luminaire reflector.

When Trimlines are wall mounted in exterior situations ensure that the drain hole in the gallery is clear and situated towards the bottom of the luminaire.

NOTE: This luminaire should be cleaned using warm soapy water and a soft cloth. Ensure that the mains electrical supply is switched off during cleaning.

Dispose of lamps in accordance with manufacturer's instructions.

Typical Gasket Arrangements

Suitable for use indoors

Geeignet für Innenanwendung
Pour un usage interne
Adecuada para uso en interiores
Geschikt voor gebruik binnen
Lämplig för inomhusbruk

Replace any cracked protective shield.
