Routine Testing

Testing should be carried out in accordance with the recommendations of BS5266.

1. A monthly functional test.
2. Twice yearly, a one hour test.
3. Every three years, a full three hour duration test.

The above tests assume a three hour system.

4. Batteries should be replaced when the luminaire no longer meets the 3 hours duration performance.
5. Testing could be performed by interrupting the fixed phase supply for the test duration, during which the luminaire should remain lit.
6. Ensure that the 'LED' is 'OFF' during 'Discharge Mode', and 'ON' during 'Charging Mode'.
7. Replace faulty lamps immediately.

To assist with this testing, a test card is included below.

If the charge indicator (LED) is unlit, this signifies a fault. To increase the chance of a fault being reported between monthly tests, it is desirable that staff are made aware of the purpose of the indicator.

This module should not be modified or repaired by any person other than those nominated by the manufacturer. ANY unauthorised modifications may render the module unsafe and will invalidate our warranty and conformance to any safety standards that may apply. The company will accept no responsibility for any modified modules, or for damage caused as a result of modifications.

All details are given for guidance only and do not constitute a contract. We reserve the right to change the characteristics of products without notice.
