**Disconnect from mains supply before replacing the fuse or the lamp.**  
**Vor dem Einsetzen der Sicherung oder der Lampe Spannungsfreiheit herstellen.**  
**Débrancher le secteur avant de remplacer le fusible ou l'ampoule.**  
**Desconectar del suministro de la red, antes de realizar la sustitución del fusible o de la lámpara.**  
**Voor het vervangen van lamp of zekering, eerst netspanning uitschakelen.**  
**Koppla bort spänningen före byte av en säkring eller en lampa.**

**Switch Off**  
**Abschalten**  
**Débrancher**  
**Desconectar**  
**Uitschakelen**  
**Stäng av**

These luminaires are suitable for wall or ceiling mounting in interior situations (IP20) as supplied, or for exterior situations (IP23) in conjunction with the 'Gasket Accessory'. They are primarily designed for installation in conjunction with a flush mounted conduit box with 50.8mm (2") fixing centres.

These luminaires should be installed by a suitably qualified person in accordance with good electrical practice and the appropriate national wiring regulations.

Switch off mains electrical supply before commencing installation.

**Installation Procedure**

Switch off mains electrical supply.

Remove the diffuser from the gallery by twisting a coin in the slot provided.

Unscrew the reflector retaining/earth screw and remove the reflector. On certain types it will be necessary to ease the reflector from under the lugs on the gallery before it can be removed.

Clear the appropriate fixing holes in the gallery and with certain types, the drain hole which is situated on the inside wall of the gallery. See illustration.

Pass the special heat resisting flying leads through the central cable entry hole in the gallery and through the gasket accessory, if applicable.

Offer the gallery to the mounting surface and connect the flying leads to the corresponding mains supply leads using a suitable terminal block.

Locate the terminal block in the conduit box.

Fix the gallery, and the gasket accessory, if applicable, to the conduit box using suitable screws.

For wall installation of all types, except the 1035, note the attitude of mounting marked on the gallery or reflector. For the 1035 type the attitude of wall mounting should be such that one of the coin slots in the gallery is accessible from below.

Re-fit the reflector and tighten the retaining screw.

Fit pearl GLS lamps which must not exceed the rating on the reflector.

Snap on the diffuser.

**Internal Connections to the Mains Supply**

In the event that it is necessary to make the mains supply connections within the luminaire the following precautions must be taken:

A suitable nylon terminal block must be fixed on the pegs provided in the gallery.

The PVC insulation on the mains supply leads must be stripped back to 50mm outside the gallery and individual silicone rubber sleeves fitted to each lead to cover their entire exposed length and overlap the PVC insulation by at least 25mm.

These luminaires must be earthed.

These luminaires should be cleaned using warm soapy water and a soft cloth. Ensure that the luminaire is switched off during cleaning.

Dispose of lamps in accordance with manufacturer's instructions.

**Suitable for use indoors**

Geeignet für Innenanwendung  
**Pour un usage interne**  
 Adecuada para uso en interiores  
**Geschikt voor gebruik binnen**  
 Lämplig för inomhusbruk

**Replace any cracked protective shield.**

Dieses symbol bedeutet, dass defekte Schutzgläser sofort ersetzt werden müssen.

**Ce symbole indique que vous devez remplacer tout verre de protection fêlé.**

Este símbolo indica que hay que reemplazar filtros en caso de rotura o desperfectos.

**Dette symbolet indikerer at alle ødelagte (sprukne) sikkerhetglass må skiftes.**

Valaisinta ei saa käyttää ilman suojalasia vioitunut suojalasi on vaihdettava uuteen ennen valaisimen käyttöön ottoa.
