This luminaire has been designed for interior recessed ceiling mounting situations, and is suitable for mounting in combustible surfaces and recesses.

This luminaire requires a ceiling aperture of 285mm diameter and a recess depth of 100mm.

This luminaire should be installed by a suitably qualified person in accordance with good electrical practice and the appropriate national wiring regulations.

Switch off mains electrical supply before commencing installation.

Installation Procedure

Switch off mains electrical supply.

Check that the rating marked on the luminaire label conforms with the mains electrical supply.

Remove the bezel from the gallery.

Extract the bezel from the gallery.

Extract the three mounting clips from the gallery as shown in Fig. 1.

Offer the gallery to the prepared ceiling aperture and connect the flexible cable to the mains electrical supply using a remote junction box in the ceiling void.

Insert the gallery into the ceiling aperture and secure it in position with the three mounting clips as shown in Fig. 2.

NOTE: Two clip positions are provided, the lower position for ceiling thicknesses from 5-15mm and the upper position for ceiling thicknesses from 15-25mm.

Fit the appropriate lamp as indicated on the luminaire label, by pushing it firmly into the lampholder.

Place the diffuser into the bezel, and fit the bezel/diffuser assembly into gallery, ensuring that the three bezel spring clips are located into the retaining slots in the gallery.

Suitable for use indoors

Geeignet für Innenanwendung

Pour un usage interne

Adecuada para uso en interiores

Geschikt voor gebruik binnen

Lämplig för inomhusbruk

Replace any cracked protective shield.
