 Stäng av

This fitting is suitable for exterior mounting (IP23).

It is recommended that installation is carried out by a suitably qualified person, in accordance with I.E.E. Wiring Regulations and relevant legislation.

Switch off the mains electrical supply before commencing installation.

INSTALLATION PROCEDURE

Unscrew the two lampholder cover securing screws and remove the cover from the fitter. To prevent condensation forming in the globe/shere drill a 5mm diameter ventilation/drainage hole in the base of the fitter where marked 'DRAIN HOLE'.

Screw the fitter onto the mounting spigot on the bollard tube and tighten the spigot locking screw.

Feed the mains supply cable through the cable gland in the base of the bollard, up the bollard tube and out through the aperture in the fitter. Tighten the cable gland locknut.

Secure the bollard in position using suitable fixings.

Connect the mains supply cable leads to their respective terminals in the fitter terminal block and connect the earth leads to the fitter earth terminal.

Place the lampholder cover on the fitter, screw the lampholder cover securing screws in a few turns to leave the cover loose enough to allow the globe/sphere to be located under it.

Screw in the appropriate lamp as indicated on the luminaire label, into the lampholder.

Position the globe/sphere between the lampholder cover and the fitter ensuring that it sits concentrically on the fitter sealing ring. Screw in, but do not overtighten the lampholder cover securing screws.

Replace any cracked protective shield.
 Dieses symbol bedeutet, dass defekte Schutzgläser sofort ersetzt werden müssen.
Ce symbol indique que vous devez remplacer tout verre de protection fêlé.
 Este simbolo indica que hay que 'reemplazar filtros en caso de rotura o desperfectos'.
Dette symbolet indikerer at alle odelagte (sprukne) sikkerhetglass må skiftes.
 Valaisinta el saa käyttää ilman suojalasia vioitunut suojalasi on vaihdettava uuteen ennen valaisimen käyttöön ottoa.
