This luminaire and associate auxiliary power module give maintained emergency operation for a 3 hour duration. The luminaire is suitable for interior ceiling or wall mounting to a conduit box with 50.8mm centres. This luminaire can also be installed in exterior situations when used in conjunction with a conduit box sealing kit - 0005 A02.
 NOTE: the luminaire auxiliary power module must NOT be installed in any exterior situations.
 Installation should be carried out by a suitably qualified person in accordance with good electrical practice and the appropriate national wiring regulations.
 Switch off mains electrical supply before commencing installation.

INSTALLATION PROCEDURE

Remove diffuser (H) from gallery (A) by twisting a coin in slot (D) between gallery and diffuser.
 Check rating marked on label (M) conforms with mains electrical supply.
 Loosen gear tray fixing screws (B) and remove gear tray (K) from gallery (A).
 Clear appropriate fixing holes and cable entry hole in gallery.
 NOTE: Gallery (A) is marked TOP if wall mounting.
 Feed mains supply cable and luminaire/module connection cable through hole in gallery. NOTE: For exterior situations refer to Installation Instructions supplied with sealing kit - 0005 A02. Secure gallery to conduit box using suitable M4 screws.

Strip mains supply cable outer sheathing and cover leads with supplied silicone sleeving. Feed sleeved leads and luminaire/module connection cable through cable entry hole in gear tray (K). Locate keyhole slots (L) over screw heads (B), rotate gear tray clockwise and tighten screws.
 Connect mains supply leads to their respectively marked terminals in mains terminal block (N).
 Secure luminaire/module connection cable (G) in cable clamp (F) and connect coloured leads to their respectively marked terminals in terminal block (E).
 Fit appropriate lamp as indicated on label (M), by pushing it firmly in lampholder (J).
 Fit diffuser (H) by pressing it onto gallery rim.
