

Disconnect from mains supply before replacing the fuse or the lamp.
 Vor dem Einsetzen der Sicherung oder der Lampe Spannungsfreiheit herstellen.
Débrancher le secteur avant de remplacer le fusible ou l'ampoule.
 Desconectar del suministro de la red, antes de realizar la sustitución del fusible o de la lámpara.
Voor het vervangen van lamp of zekering, eerst netspanning uitschakelen.
 Koppla bort spänningen före byte av en säkring eller en lampa.

Switch Off
 Abschalten
Débrancher
 Desconectar
Uitschakelen
 Stäng av

This fitting is suitable for exterior mounting (IP23).

It is recommended that the installation is carried out by a suitably qualified person, in accordance with I.E.E. Wiring Regulations and the relevant legislation.

LAMP Switch off the mains electrical supply before commencing installation.

INSTALLATION PROCEEDURE

Unscrew the two lampholder cover securing screws and carefully lift the cover off the fitter as leads from the secondary lamp socket are connected to a terminal block in the fitter.

To prevent condensation forming in the sphere (when mounted vertically), drill a 5mm diameter ventilation/drainage hole in the base of the fitter where marked 'DRAIN HOLE'. If the sphere is to be mounted horizontally or inverted, a 5mm diameter hole must be made at its lowest point.

Place the sealing washer over the mounting spigot. Pass the mains supply cable and the secondary lamp cable from the pole top or arm as applicable, through the mounting spigot and out through the aperture in the fitter. Tighten the cable clamp screw in the mounting spogot.

Insert the mounting spigot with the sealing washer in position into the pole or arm as applicable and tighten the three locking screws.

Connect the mains supply cable leads to their respective terminal in the fitter mains terminal block, connect the earth lead to the fitter earth terminal. Connect the secondary lamp cable leads to the secondary lamp terminal block.

Place the lampholder cover on the fitter and screw in the cover securing screws a few turns to leave the cover loose enough to allow the sphere to be located under it.

Screw the appropriate lamp as indicated on the luminaire label, into the lampholder. Insert the appropriate tungsten lamp into its socket on the cover.

Locate the heatshield ring in the groove in the neck of the lampholder cover.

Position the sphere between the lampholder cover and the fitter ensuring that it sits concentrically on the fitter sealing ring, and tighten the lampholder cover securing screws.

Replace any cracked protective shield.

Dieses symbol bedeutet, dass defekte schutzgläser sofort ersetzt werden müssen.

Ce symbol indique que vous devez remplacer tout verre de protection félé.

Este simbolo indica que hay que 'reemplazar filtros en caso de rotura o desperfectos'.

Dette symbolet indikerer at alle ødelagte (sprukne) sikkerhetglass må skiftes.

Valaisinta el saa käyttää ilman suojalasia vioitunut suojalasi on vaihdettava uuteen ennen valaisimen käyttöön ottoa.

Suitable for use indoors
 Geeignet für Innenanwendung
Pour un usage interne
 Adecuada para uso en interiores
Geschikt voor gebruik binnen
 Lämpig för inomhusbruk

This Electrical Product
MUST be recycled.
