This series of luminaires are suitable for interior ceiling mounting to a 50.8mm conduit box or directly to the mounting surface.

Installation should be carried out by a suitably qualified person in accordance with good electrical practice and the appropriate national wiring regulations.

Switch off mains electrical supply before commencing installation.

Installation Procedures

Gear Unit Installation - Fig. 1.
Unscrew domed cover (G) from gear unit (C) and check rating marked on label (F) conforms with mains electrical supply.

Remove mounting plate (B) from the gear unit (C) and secure the plate to the conduit box using suitable M4 screws, or if fixing directly to a mounting surface, mark hole positions using the mounting plate (B) as a template and discard mounting plate.

Feed mains supply cable (A) through the gear unit (C). Secure gear unit (C) to the mounting plate (B) with screws supplied, or to the mounting surface using suitable round headed screws through the outrigger holes (E).

Connect cable leads in the terminal block (D). For loop/ring and switch wiring refer to the Wiring Diagram.

Pass pendant cable (H) through the domed cover (G), unit bracket and cable clamp (I). Connect the pendant leads in the terminal block (J). Tighten clamp screws (I) and screw the domed cover (G) on the gear unit (C).

Fig. 1

Fitting Lamp and Globe - Fig. 2.

Fit the lamp tube on the lampholder tube with the mounting pins (D). Applicable to 8022/8032 series only.

Insert appropriate lamp as shown on the label (A). Locate the globe (C) between the support plate (E) and the cover (F), and secure with the retaining screws (G).
NOTE: Do not overtighten the cover screws.

WARNING: This luminaire must be earthed.

NOTE: This luminaire should be cleaned using warm soapy water and a soft cloth. Ensure luminaire is switched off during cleaning.

Dispose of lamps in accordance with manufacturer's instructions.
