This downlight is suitable for interior ceiling mounting, and should be installed in conjunction with a Marlin transformer/power module. The emergency version is classified as a self contained unit.

Installation should be carried out by a suitably qualified person, in accordance with good electrical practice and the appropriate national wiring regulations.

Switch off the mains electrical supply before commencing installation.

INSTALLATION PROCEDURE

The housing (A) requires a 120mm aperture, a recess depth of 190mm and a minimum clearance of 75mm between outside of housing and recessed enclosure.

Remove mounting clips (B) from housing (A) as shown in Figure 1.

Remove cover (H) and pass cable (K) from transformer, or cable supplied if emergency type, through hole (L) and cable clamp (J).

NOTE: Maximum cable size 4mm, and must be able to withstand temperature of 75 degrees centi-grade.

Connect cable leads in terminal block (M), tighten cable clamp screws and replace cover (H).

Insert housing (A) in ceiling aperture and secure with mounting clips (B) as shown in Figure 2.

NOTE: Use bottom slots for 1-12mm ceilings or top slots for 12-25mm ceilings.

Fit appropriate lamp (D).

If applicable, place step cone (E) or wallwasher (G) in trim (F), engage trim on catches (C) and lock in position. Alternatively, engage halo (N), deco glass (P) or dark/light cone (Q) on catches (C) and lock in position.

Replace any cracked protective shield.

Dieses symbol bedeutet, dass defekte Schutzgläser sofort ersetzt werden müssen.

Ce symbol indique que vous devez remplacer tout verre de protection fêlé.

Este símbolo indica que hay que reemplazar filtros en caso de rotura o desperfectos.

Dette symbolet indikerer at alle ødelagte (sprukne) sikkerhetglass må skiftes.
