This luminaire is suitable for interior ceiling or wall mounting.

Installation should be carried out by a suitably qualified person in accordance with good electrical practice and the appropriate national wiring regulations.

Switch off mains electrical supply before commencing installation.

**Installation Procedures**

Check rating marked on label (D) conforms with mains electrical supply.

Prepare suitable fixings in mounting surface at 200mm or 275mm centres.  
 NOTE: For wall mounted applications gallery is marked 'TOP'.

Secure gallery (E) to mounting surface using suitable round headed screws.

Connect leads of luminaire cables (A, B and C) to remote box as shown on the cable labels and wiring Instruction Sheet IS5287.

Fit appropriate lamp as indicated on label (D) by pushing it firmly into lampholder.

Push halo ring (J) onto retaining brackets (F).

Insert diffuser (K) into ring ensuring it is held concentrically by retaining lugs (G).

**Testing**

Switch on mains electrical supply and check that the charge indicator (H) is on.

Leave luminaire on continuous charge for 24 hours.

Simulate mains failure, and check that the lamp operates for 3 hours. If full duration is not achieved repeat charge/discharge cycle as battery packs may have discharged in stock and will require conditioning.

**WARNING:** Do not extend 0.5m cables fitted to luminaire.

**WARNING:** This luminaire must be earthed.

**WARNING:** Do not insulation test.

**NOTE:** This luminaire should be cleaned by using warm soapy water and a soft cloth. Ensure luminaire is switched off during cleaning.

Dispose of lamps in accordance with manufacturer's instructions.

### Routine Maintenance

Routine maintenance must be carried out in compliance with the requirements of BS5266:Part 1 - Emergency Lighting of Premises.

The following tests assume a three-hour system.

- Daily:**
1. Check that any recorded faults have been rectified.
  2. Check that the maintained emergency lamp is operative.
  3. Check that the charge indicator light is illuminated.
- Monthly:**  
(Functional)
1. Simulate a mains failure and check that the emergency lamp illuminates and remains on for several minutes.
  2. After reverting back to mains supply check the charge indicator light is illuminated.
- Six Monthly:**  
(1 Hour)
1. Simulate a mains failure and check that the emergency lamp illuminates and remains on for one hour.
  2. After reverting back to mains supply check the charge indicator light is illuminated.
  3. On restoring the mains supply the unit will require approximately 24 hours to recharge before becoming fully operational.
- Three Years:**  
(3 Hours)
1. Simulate a mains failure and check that the emergency lamp illuminates and remains on for at least 3 hours.
  2. After reverting back to mains supply check the charge indicator light is illuminated.
  3. On restoring the mains supply the unit will require approximately 24 hours to recharge before becoming fully operational.

It is recommended that the battery packs and lamps are replaced every 4 years or sooner if the units performance fails to meet the above requirements. To maintain optimum unit performance, only approved replacement battery packs and lamps must be used.

All routine maintenance checks must be recorded on the unit Routine Test Record and must be made available for inspection at all times.
