This luminaire is suitable for interior ceiling mounting and requires a 210/212mm diameter aperture and a recess depth of 205mm.

Installation should be carried out by a suitably qualified person in accordance with good electrical practice and the appropriate national wiring regulations.

Switch off mains electrical supply before commencing installation.

INSTALLATION PROCEDURE

Prepare aperture in mounting surface. NOTE: To avoid damage when installing/removing downlight in mounting surfaces shown in Fig.2, it is recommended that Ceiling Ring Accessory - SXR3 is used.

The mounting clips can be fitted in two positions. Use bottom holes as shown in Fig.1 for ceiling thickness of 6-15mm or top holes for ceiling thickness of 15-30mm.

Connect mains supply leads in respectively marked

terminals in remote box terminal block (D) as shown in diagrams above.

NOTE: Ensure voltage tapping lead (E) is connected in appropriate mains voltage terminal in terminal block.

Pass remote box (A) through aperture and place on inside of mounting surface.

With housing in maximum down position, locate downlight in aperture, holding downlight and mounting clips as shown in Fig.3, push clips with fingers and push upwards with thumbs as shown by arrows.

Pull housing down at indicator (F), hold housing and rotate trim/glass assembly (C) anti-clockwise to remove.

Fit appropriate lamp as indicated on label (B).

Locate trim/glass assembly (C) in housing clips and rotate clockwise to lock.

To remove downlight - Pull housing down, rotate to stop, and pull on housing.

WARNING:
