Trimline Installation (tungsten units)

Gallery

Reflector

Diffuser

Switch off electrical supply at the Mains.

- 1 Remove diffuser from gallery by twisting a coin in the slot provided and carefully detach the reflector by loosening the screw and/or easing the reflector off the retaining lugs, where applicable.
- 2 Fittings are pre-wired with heat resisting leads. Brown – Live; Blue – Neutral; Green/Yellow – Earth. Leads should be passed through the hole or knockout in the gallery and connected to the supply using a high temperature terminal block, preferably housed in a 2" centre conduit box. If a conduit box is not available, the supply may be connected inside the gallery using a suitable high temperature terminal block. Protect the incoming supply leads with high temperature sleeves.

*The 200mm (8") dia. (1027) model is double insulated  and an earth lead is not required.

- 3 Screw the gallery to the ceiling or wall, preferably to a 2" centre conduit box. (Other international fixing centres are also provided). When wall mounted, the lampholder should be at the top.
For mounting in exposed positions use conduit box gaskets.
- 4 Refit the reflector carefully by tightening the screw and/or easing the reflector under the retaining lugs, where applicable.
- 5 Fit standard Pearl GLS lamps only. DO NOT EXCEED MAXIMUM WATTAGE STATED ON THE REFLECTOR.
- 6 Snap on the diffuser.

If in any doubt, consult a qualified electrician.

Replace any cracked protective shield.

Dieses symbol bedeutet, dass defekte Schutzgläser sofort ersetzt werden müssen.

Ce symbol indique que vous devez remplacer tout verre de protection fêlé.

Este simbolo indica que hay que 'reemplazar filtros en caso de rotura o desperfectos'.
