Stäng av

To optimise lamp and ballast performance, it is recommended that the lantern ballast is tapped at the nominal voltage that is within 5 Volts of the supply voltage.

For example: 242V Supply - Use 240V Tapping
247V Supply - Use 250V Tapping

Installation Procedure

Secure pattress (F) to a flat mounting surface using suitable fixings.

If surface wiring is being used, fit 20mm conduit in outlet in pattress base.

Pass lantern cable through conduit for connection to mains supply.

Unscrew cover screws (A) and open cover.

Check that voltage tapping lead is connected in appropriate ballast terminal (see diagram).

Screw lantern fixing bolts (E) into pattress, ensure fixing bolts (E) are fully located in lantern keyhole slots and tighten fixing bolts (E).

Fit appropriate lamp as indicated on label (C) located near lampholder.

Check that seal (D) is in position.

Press stay button (B), close cover and tighten cover screws (A).

NOTE: Supplied sheathed cable is not suitable for exterior surface use unless it is enclosed in a conduit.

NOTE: The total maximum weight per lantern and mounting bracket is 16Kg.

NOTE: This product must be earthed.

NOTE: Suitable for exterior mounting.

Suitable for use indoors
Geeignet für Innenanwendung
Pour un usage interne
Adecuada para uso en interiores
Geschikt voor gebruik binnen
Lämplig för inomhusbruk

Replace any cracked protective shield.

Dieses symbol bedeutet, dass defekte Schutzgläser sofort ersetzt werden müssen.

Ce symbole indique que vous devez remplacer tout verre de protection fêlé.

Este símbolo indica que hay que reemplazar filtros en caso de rotura o desperfectos.

Dette symbolet indikerer at alle ødelagte (sprukne) sikkerhetglass må skiftes.

Valaisinta ei saa käyttää ilman suojalasia vioitunut suojalasi on vaihdettava uuteen ennen valaisimen käyttöön ottoa.
